Lancaster Farming

Lancaster, Pa., Saturday, July 9, 1960 $2 Per Year

TOBACCO FIELDS GOT HAND TREATMENT on most county farms this week ting is virtually completed, but some reports indicate a few scattered acres are still ng for plants The dry weather has not apparently slowed the growth of plants in field The threat of cutworm damage seems to be lessened since the weather is ewhat drier Larger weeds in corn and tobacco fields are quite persistant, but con- of small weeds in most parts of the county seems to be quite easy with the few in- of dry topsoil. —L. F. PHOTO

Tobacco, Wheat Share Farm Work Spotlight

Tobacco and wheat shared the farm work spotlight this week as farmers pushed to finish the tobacco planting and begin the big push to get wheat in the bin before the good weather breaks.

Most of the county tobacco acreage was planted by the latter part of the week and wheat harvest was beginning by the middle of the week. Most of the wheat harvested was Thorne, Dual, or Seneca, with the Pennoll carrying too much moisture until very late in the week Most millers were recommending that Pennoll be left in the field until the week of July 11.

Reports from receivers of grain indicated that moisture in the crops harvested Wednesday and Thursday averaged between 13 and 15 percent. Quality of thegrain is good, but some of the yields are disappointing. Farmers believe that the large amount of rain during the blossoming season was one factor in the smaller crop. Millers and warehousemen anticipate a large flush of grain next week.

Corn continues to make satisfactory growth after a late start. Weeds which were a serious problem earlier are becoming easier to control with the smaller amount of moisture available. Cool nights, if they continue could cause serious slow down of corn growth soon.

A very few Washington Boro area tomatoes hit the market this week, but the crop generally is ten days to two weeks later than normal Substantial quantities of the fruit is expected to be ready to harvest next week

Early sweet corn will move on the markets in small amounts next week. The higher temperatures and reduced rainfall have had a beneficial effect on most vegetable crops.

Second cutting alfalfa is ready to be cut on some county farms and late cut alfalfa and clover is making rapid growth.

hildren Use More Milk ith Special Progam

ildren who attend ols participating in the al Milk Program drink milk in a 24-hour peri- han children attending schools, according to a rt issued recently by the Department of Agricul-

e Special Milk Program les schools to offer milk ildren at reduced prices, ddition to milk provided under the National School Lunch Program. The study reported recently was undertaken by USDA's Agricultural Marketing Service to learn whether the Special Milk Program increased consumption of milk among school children, or merely caused the children to drink more milk at school and less at home than they would drink without the program.

Researchers interviewed 8,444 children in 100 schools in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, and West Virginia. The children were enrolled in grades five through nine. Half the schools participated

Mulch Controls Garden Weeds

By doing a good job of mulching, home gardners can go vacationing and forget the weeds, gardening specialists agree. Mulch also saves soil moisture, prevents soil pudding, helps keep soil temperatures uniform and releases plant nutrients when it decomposes.

Hay and straw mulches should be 3 to 4 inches deep for best results, while 2 inches is deep enough for ground corn cobs, sawdust and shavings. A lot of different materials can be used for mulching, experts suggest avoiding those that contain a lot of weed seeds.

Sometimes materials, such as straw, chopped corn cobs and sawdust, are low in nitrogen and may cause nitrogen deficiencies in the soil.

(Turn to page 12)

County Vegetable Growers Invited To Attend Tour

The annual tour of the Pennsylvania Vegetable Growers Association will be conducted on July 25 and 26, according to information received from Amos Funk, Millersville, president of the association.

Main attraction on the tour will be a visit to four outstanding vegetable growers in Erie County. Growers will have the opportunity to observe both the production and marketing operations followed by the Erie County producers. Roadside markets operated by several farmers will be visited.

Erie county farmers plant approximately 7,600 acres to commercial vegetable crops annually. Total value of vegetables, including potatoes, produced in Erie county is nearly 2 5 million dollars.

The major vegetable crops to be seen on the tour will be cabbage, potatoes, beans, tomatoes, sweet corn, melons, cucumbers and asparagus.

At one stop, the growers on the tour have an opportunity to observe a mechanical bean picker in operation on the farm of James Hall. Mr. Hall grows about 120 acres of wax and green beans.

The new dwarf tomato variety, Epoch, will be on display at one of the stops on

(Turn to page 12)

Select Sires With Caution Experts Suggest

Selection of the sire for the farm beef or swine herd or the farm sheep flock often does not receive the attention it deserves, warn extension livestock specialists.

Too often the cheapest animal is purchased, and this turns out to be expensive rather than cheap in too many cases. If a second rate sire is selected it could turn out to be a non-breeder, or one that produces the wrong kind of offspring. Buy from reputable purebred breeders, because they will make adjustments for non-breeders.

Look for these major faults in animals to avoid when buying sires or replacement livestock:

Avoid buying animals with crooked legs. This can lead to lameness and cut the reproductive life of the individual.

Wayne Rentschler Accepts Vo-Ag Position at Kutztown

Wayne B. Rentschler, manager of membership relations with Lancaster County Farm Bureau, has resigned the position to become teacher of vocational agriculture at the Kutztown Area Schools

Rentschler, who resides at Lampeter where he was teacher of vocational agriculture in the high school for

WAYNE B. RENTSCHLER

20 years from 1927 to 1947, is active in many farm organizations.

Serving the West Lampeter Community Fair association as secretary-treasurer for his 31st term, Rentschler has seen the organization grow and develop along agricultural lines He has been one of the forces in keeping the non-agricultural elements out of the fair.

Rentschler has served as secretary - treasurer of the Lancaster County Soil Conservation District, since 1951 and the County Agricultural Council since 1955.

Working to coordinate the work of all county farm cooperatives, Rentschler has served as president of the Lancaster County Council of Farmer Coopertives since its inception in 1954.

During 1959, Rentschler headed up the International Farm Youth Exchange Committee in the county which made possible the sending of Jemes Hess, Strasburg, to Peru for a year. During 1958 and 1959, Rentschler was state chairman of the now defunct Chicken of Tomorrow contest. Since then he has been state chairman of the FFA. conservation contest sponsored by the State Soil Conservation District.

While he was a teacher at West Lampeter, Rentschler saw 32 of his students receive the Keystone Farmer degree and six were awarded the American Farmer degree.

Mr. and Mrs. Rentschler plan to move to Kutztown about the third week of July. They will then reside about 25 miles from Bernville, where the two attended high school.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days will average near normal to four degrees above the normals of 87 in the afternoon and 66 at night. A warming trend is expected Saturday thru Monday cooling Tuesday or Wednesday. There is a chance of scattered thundershowers Sunday night or Monday with the average precipitation expected to be less than ¼ inch.

At Lancaster Yards

Steers Unevenly Higher

James E. O'Hara,
In Charge, Market News Branch

CATTLE: 2800 compared with 3000 last week. The shortened holiday week's supply includes 55 per cent slaughter steers, 35 per cent stockers and feeders. Trading slow. Compared with last week's close, slaughter steers steady - 50 lower. Cows steady to 25 higher. Bulls steady. Stockers and feeders steady

Choice grade 1000-1350 lb slaughter steers sold for 26.25 - 28.00, load Choice carrying a Prime end 1431 lbs. 28.25, load and lot 1135-1275 lb. high-Choice 28.50-28.75, while Good and low-Choice slaughter steers brought 23.50-26.25 with Standard down to 21.00.

Good and Choice heifers ranged from 21 50-25.00. Cutter and Utility cows 15.75 - 18.50, Canners and low - Cutters 14.50-15 75. Utility and Commercial bulls 20.00-23.00, Good grade bulls 22-23.75 Medium and Good 600-900 lb. feeder steers 23.50-28 00, few Medium and Good stock calves 27.00-30 00.

CALVES: 550 compared with 512 last week. Trading moderately active. Vealers were steady. Good & Choice vealers brought 27.00-32.00. Choice and Prime 32.00-36. Standard and low-Good 19.-27.00, Utility down to 16 00

HOGS. 1100 compared with 1057 last week Trading was moderately active. Barrows and gilts sold at fully steady rates Sows strong U. S. 1-2 grade 190-225 lb barrows & gilts sold for 19.00-19.75 with several lots U S. no 1's 190-225 lbs at 19 75-20 00 U. S. 1-3 grade 190-230 lb butchers 18 50-19 00, mostly 18 75 up. 230-250 lb hogs 18 00-18 50. U S 1-3 grade, mostly 2-3, 300-600 lb. sows 11 00-13.50

SHEEP: 250 compared with 417 last week. Trading moderately active. Good and Choice spring lambs 2.00 higher, Utility steady. Good and Choice 60-90 lb. spring lambs sold at 20.00-23.00, while few lots Choice and Prime made 24.00, Utility sold down to 16.00.

Chicago Cattle

ReceiptsUneven Prices Steady

Receipts for the holiday shortened week were about five per cent below last week. Distribution of receipts very uneven with Tuesday's receipts accounting for 80 per cent of the week's supply and Wednesday's receipts the smallest for any Wednesday since September 1953.

Consist of receipts little changed with 75 per cent slaughter steers, between 15 and 20 per cent heifers and about 5 per cent cows. Vealers and stockers and feeders in very light supply.

Percentage of slaughter steers about like the 4 per cent last week and per cent of choice little changed from last week's 70 per cent. Average weight of slaughter steers a few pounds heavier than the 1155 lb. average last week.

Slaughter steers, good grade and below steady to 25 higher, other kinds steady to strong.

Two loads prime 1333 to 1366 lb. steers 29.50. Load-lots high choice and mixed choice and prime 26.25 to 28 50 with most sales at 26-75 Bulk of the good to average choice steers 22.50 to 26 75. Most average choice from 25.75 to 26.50

Good and choice vealers 24-28 with standard at 18 to 23 A few lots of choice and mixed good and choice 700 to 900 lb feeding steers 24-24 50. A load of good 800 lb feeders at 22. Several loads and lots mostly good 550-675 lb stock steers 24 to 25 00.

● Milk Market

(From page 3)

At New York the wholesale price for bottling quality milk was $4 95 to $5 00, with most sales at $5 00 per 40 quart unit

Vintage Livestock

Slaughter Steers To 1.00 Higher

CATTLE: 1 390. Compared with last week, average — Good and better grades of slaughter steers 25-50 higher, low-Good and below fully 1.00 higher. Cows 25-50 higher. Bulls scarce, few sales steady to strong.

Bulk of the Choice grade slaughter steers 26.25-27.75, few average to high-Choice 1070-1200 lb. 28.10-28.60, Good to low-Choice 23.50-26.25, Standard down to 20. Cutter and Utility cows 16.50-18.60, Canners and low-Cutters 15.50-16.75, Utility and Commercial bulls 20.00-23.00, few Good grade bulls 23 50.

CALVES 282. Average - Good and better grades of vealers steady. Low-Good & below 1.00 higher. Good and Choice vealers 27.00-32.00, Choice and Prime 32.00-35, Standard and low-Good 23 50 - 26.50.

HOGS: 96. Barrows and gilts 25 higher. U. S. 1-3 grade 205-217 lb. 18.60-19.10, two lots 1-2 grade 182- and 201 lbs. 1950, lot 1-3 grade butchers 219 lbs. 20 00. Lot garbage fed hogs 2-3 grade 248 lbs. 16.50.

SHEEP: 60. Spring slaughter lambs 1 00 higher. Good and Choice 21.00-24 50, Utility and Good 17.00-21.00.

Delmarva-Georgia

Prices Decline Late In Week

Prices at DelMarVa averaged about 1¼ cents lower during the 24 hour period ending 10:30 Friday morning than earlier in the week when the sale averaged as high as 20.79.

Delmarva reported at-farm prices of 18.6 to 20.30 for 864,300 head with over half the sales between 19 and 20.

Estimated slaughter for the week end is 696,000 head

The Delmarva broiler-feed ratio for the week ending July 1 was up two points from the previous week at 4 1. Broilers during the week averaged 18 72 and mash cost $91 65 per ton.

Fluid Milk

Production Is Slightly Lower

Milk production was about unchanged to slightly below last year in some areas Supplies were generally adequate to in excess of the light to good but mostly fair, bottling demand.

Improved sales to resort areas noted in some markets; however, at Atlanta offerings decreased and very little surplus was left after filling the bottling demand At Boston surplus offerings were diverted to separators

FROM WHERE WE STAND -

Is The Salesman Worth His Hire?

A certain sales company has a slogan which says, "The only possible way to pay a salesman what he is worth is to put him on direct commission."

We tend to agree that the only fair measure of the worth of a salesman is the amount of his sales, if good will is discounted.

Now when you can get a salesman who can do a good job of selling for the highest price and build good will for the business at the same time, it seems to us that you should use that salesman as much as possible.

By the same reasoning, the most accurate method of arriving at the true worth of an item is to assemble all the people who would like to have that item and sell to the person who wants it most, that is, the one who is willing to pay the highest price.

Farmers could do this by themselves if they had sufficient volume, and if the farmer could inform all the buyers when he would have the product available, but this is seldom possible.

Several good agencies in the county overcome both the volume and advertising obstacles to selling by bid. Why do so few farmers take advantage of these agencies.

A prime example of this type of agency is the Lancaster Poultry Exchange Officials at the Poultry Center have listed at least seven advantages the Exchange has which the individual farmer cannot attain by himself.

Many of the livestock auctions as well as the Poultry exchange sells to bonded buyers. This guarantees payment to the producer. Some unfortunate situations in the past, when buyers went broke or moved away, could have been avoided if the product had been marketed through the Poultry Exchange.

The grower is guaranteed a price for his poultry. If the market fluctuates between the time of sale and the time of delivery of the product, the settlement is at the contract price.

Movement of poultry bought on the Exchange must be within the specified time and at the price quoted. If for some reason the poultry can not be moved within the alloted time, a penalty for each day of delay can be enforced, unless the seller agrees to allow the poultry to stand.

In using the Exchange, the seller need not contact a host of buyers, ask their price and play one against the other trying to get the highest price and possibly miss the market he wanted while trying to make a satisfactory sale. Market price is established at the time of the sale by competitive bidding, and the seller is free to refuse the bid if he feels it is not fair

With one call to the Poultry Center, a poultryman can notify 28 buyers that he has poultry to sell.

Prompt payment for poultry is assured through the use of the Exchange In the past we have heard many stories of how some buyers would purchase a truckload of poultry and sell it before settling with the farmer. In many instances, especially if the dealer was caught with a slipping market, the farmer had to wait quite a while. The Poultry Center contract calls for payment to the seller within seven days after movement of the birds.

Listing as a clincher, The Establishment Of a Market Price, the Poultry Center officials get back to the original idea of this piece. Many of the independent sales of poultry in the county are based on the sale average at the Poultry Center and on the sale average at the DelMarVa auction. "When auction sales are no longer in existance, who and what will establish the price paid?" the officials ask.

The motto will again be as in the past, "Let the Seller beware."

At least that's how it looks from where we stand.

The Farm Problem

If you are good at mathematics, know something about farming, and like an argument, there is a free-for-all just starting that you might like to get into.

For the past 10 years it has been rather generally assumed that we have a "farm problem" in this country, although not everyone has agreed on just what the problem is. Congress has debated it endlessly without agreeing on a solution.

Now mathematicians and statisticians have begun a hot argument over whether there really is any "farm problem." They are using figures, charts, equations and mathematical formulas to support their arguments.

Personally, this is one argument we intend to steer clear of and report impartially, figure by figure, strictly as a spectator. To bring you up-to-date, here is what happened so far in the battle of the mathematicians.

A Matter of Money

The question is: Are the farmers getting a fair share of the national income?

"No," say U. S. Department of Agriculture statisticians, economists and mathematicians.

"Yes," say statistical experts who have supplied the Farm Journal with figures showing farmers have 50% more income than the average American family.

The Farm Journal is an old and highly respected farm magazine and so it surprised a lot of folks when it bought a full page advertisement in the equally reputable Wall Street Journal to tell businessmen what its mathematicians had learned about farmers.

Farmers last year, the Journal reported, had a gross income of more than $46 billion. That, if equally divided, would give each farm family an income of $9,978, compared with the U.S. average of only $6,470. Per capita farm income, it said, in 1959 was the highest on record.

The average farm family, the statisticians figured, owns equipment, buildings, and savings worth $43,724. How many town families, asks the Journal, are worth that much?

USDA Rebuttal

It is grossly misleading, the USDA says, to compare farmers' gross income with non-farmers take-home pay. A fair comparison, it argues would be between farmers' net income, after payment of operating expenses, with city workers' pay envelope.

The average farm worker, according to USDA figures, last year had a net income of $1,672 including allowances for housing and food grown and consumed on the farm, about one-third less than the national average.

Approximately 5,000,000 farm families last year realized a net income, including the sale of their products plus government payments, of only about $8 billion, USDA figures show, with which to pay family living expenses. The money farmers have to spend will buy less at the store than at any time since prior to World War II, the Department reports, while non-farm families can buy 50% more than in 1940

Ten years ago farmers spent 50 cents out of each dollar received for production expenses. Last year they paid 70 cents and kept 30 cents. While consumers pay 10% more for most food items than in 1950, prices paid farmers have gone down an average of 20%.

There are the figures, so if you want to get into the argument you can choose your own weapons.

Social Justice

Lesson for July 10, 1960

THE CHRISTIAN religion is said to be a religion of love, and so it is. It is love that makes it beautiful and gives it meaning. But just as the beauty and meaning of literature is built on the humble foundation of the alphabet, just as the beauty and the security of a house go down to the unseen foundations, so love itself is a stammering weak thing if it is not built on the foundation of justice. Love without justice is sloppy sentimentality, it is double-talk, it is drivel.

Dr. Foreman

Social Justice

God's prophets, whose writings are part of the Christian Bible, were interested in social justice. They were interested because God was interested. People who think that social justice is no affair of religion at all, either haven't read the prophets, or really don't believe them. Let us get straight what "social justice" is. It has nothing to do with socialism, or with social affairs as written up for the society pages. It is different from political or legal justice. (These two, of course, should also be a concern of Christians.) An example of political justice would be giving major parties equal time on the radio and TV. An example of legal justice would be getting paid a fair price for land the government has taken for a highway.

Social justice is broader and more basic than that. In a word, it means fair treatment all around. It does not mean treating everybody exactly alike, because people's needs are not always the same. But it does mean giving everybody a "fair shake," an honest deal; it means not handicapping people for "reasons" that make no difference. It means giving every one a chance to develop all he's got.

In the time of the proph
the people who needed
tice and were not getti
the poor. He speaks of
of the Israelites' mistre
them, over and over T
cheated out of justice in
because they could not

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO MOW LAWNS HIGHER—One of very important practices in having a g lawn is to mow the grass from 1½ t inches long each time, we believe some property owners do not accept recommendation and continue to their lawns shorter thinking that it lo nicer and they will not have to mow often. In these cases we feel they sacrificing a thick turf in favor of t own conveniences. During the hot s mer months of July and August it is es ially important to cut the lawn higher order to protect the grass roots from dry, hot weather

TO MULCH SHRUBBERY — Property owners who h not mulched their shrubbery about the home are remin that hot hummer months could dry out the ground many inches in depth and cause injury to all shrubb especially new planted shrubs. A two to three inch mu of peat moss, cocoa hulls, rotted sawdust, or other org material will go far toward holding moisture and reduc soil temperatures. In case of new plantings weekly appl tions of water, being sure to soak down 6 to 8 inches very important for the first growing season

TO CONTROL HOUSE FLY—Everyone should make effort to reduce the house fly population The first ste to eliminate the breeding places by keeping garbage p covered, a general clean-up program, and on the farm pose of farm manure readily. The use of screens on w dows and doors of all inhabited buildings and the da milk house is essential. The spraying of ceilings and w of porches, dairy barns, and other buildings with ins cides will kill many of the flies. Those sprays contain pyrethrins or organic thiocyanates are very good, o such as Diazinon or Ronnel are recommended.

TO TAKE TIME COMBINING—Wheat harvest is at h and the objective is to get the maximum amount of g in the bin or bag, the combine is the modern machine do this job provided it is adjusted and operated prope From past experience the great amount of volunteer gr in the fall on small grain ground is evidence that much it was missed. Combine operators are urged to wait u the moisture conditions are proper and then drive slow ough to give the combine a chance to do a good job

WEATHER

By Carol Dean Huber

This dry weather will ruin
my crops,
And soon unless the temperature drops.
Gee, I wish it would rain
today!
Remember the rain we had
in May
We said in May, "It's just
too wet."
And now we say, "It hasn't
rained yet"
We look at the sky and
wonder whether—
But we can do nothing
about the weather.

Hay Driers To Tour County

Hershey, Pa., July 9.—The Northeastern Hay Drying Association, which last summer toured farms in the Hershey-Lebanon area, will hold its second tour in Pennsylvania in this section on Friday, August 26. Charles M. Wolgemuth, manager of Hershey Estate farms, and NHDA president, and Howard Bomberger, Lebanon, R. D., will me the committee in charge.

The hay driers will visit the Masonic Homes farms, Elizabethtown, during the morning to see wagon drying in operation. In the afternoon they will witness forage machinery and equipment in operation on the Hershey Estate farms Grass will be cut and hay baled, weather permitting. The tour will follow by a day the opening of the three-day extension Southeast District Hay Show in the Hershey stadium.

Wolgemuth just recently was elected president of NHDA.

Reduce egg breakage by using only strong, rigid egg baskets that don't "give" when filled.

TREAT YOUR TOBACCO THE RIGHT WAY WITH MH-30 And Your Tobacco Will Be Right

- Read label on the container to obtain the best results
- Top and treat tobacco when it's in full bloom...or when 90% of the plants have begun to shed their first flowers
- Use 1 pint per 1,000 plants
- Use a fine-mist-type sprayer
- Harvest only fully ripe, mature leaves

A single acre of tobacco can produce over 100,000 suckers. No efficient grower can afford the disagreeable and costly 30 man-hours per acre required to pull these unwanted suckers. Let MH-30, the modern chemical sucker control, do it. MH-30 promotes grower efficiency and produces good tobacco. No grower should deny himself these advantages.

MH-30 prevents damage and breakage of leaves from hand-suckering. Growers who use MH-30 correctly save time, money and back-breaking hand-suckering—and end up at auction time with tobacco equal to that of hand-suckered tobacco—tobacco that brings prime prices from bidders who want quality.

MH-30 was developed by the Naugatuck Chemical Division of United States Rubber after 12 years of intensive research and over 5 years of rigorous field trials and use in the flue-cured areas. It is registered with the Federal Government to prevent sprouting of potatoes and for use on other crops.

For the Farm Wife and Family

Seasonal Salads

by Mrs. Richard C. Spence

Chilled summery-lrght salads are the makings of a meal—make you think cool even if you don't feel it. Cool accompaniment to charcoal grilled meats and fowl is a chilled fruit salad It might be made of fresh ripe berries combined with luscious pears, peaches, melon balls and a whipped cream dressing, or a juicy ripe melon ring capped with a scoop of creamy rich cottage cheese. Charcoal steak or cheese topped hamburgers team tastily with a tossed leafy salad boasting red ripe tomatoes, cucumber slices and zesty radishes—with a whisper of chives or scallions for onion lovers.

Treat of all is the dressing. Well blended and subtly spiced it gives character to an ordinary salad An exciting salad dressing is not hard to make; takes just a pinch of imagination and a spoonful of ingenuity.

For the tastiest salad, use a variety of greens. There are so many to choose from head and bib lettuce, leaf lettuce, water cress, curly endive, romaine and escarole, young raw spinach, Chinese cabbage, etc. Prepare ingredients in advance by washing, drying and chilling them till ready to serve. Never soak greens but simply rinse under running cold water; drain or shake off excess water and refrigerate in a covered container. Breaking lettuce into bite-sized pieces by hand makes it look fresher and prettier than lettuce cut with a knife Chilling individual salad bowls or plates helps to keep the salad fresh tasting.

Spicy garlic croutons are a welcome crunchy topping for leafy salads. They can be made ahead, if you like, refrigerated and oven heated just before serving. To make croutons: cut bread into small cubes, leaving crusts on Place in shallow pan and toast in slow oven (275-300 degrees) till golden brown and dry. Melt butter in skillet with a peeled clove of garlic The quantity of butter you use will depend on the amount of croutons you are preparing Add toasted bread cubes and toss until all are butter coated. Remove garlic and serve croutons hot.

To toss greens and dressing with a professional air: use a large enough bowl to be able to toss thoroughly. A large salad fork and spoon make the job easier. Go to the bottom of the bowl with the spoon as you go up and over with the fork—the fork goes under, while the spoon goes up and over, till tossing is done.

We often forget that our bodies must be as adequately nourished in summer as in winter. Protein-rich foods, calcium and other essential minerals and vitamins are just as necessary during this season. A tray of assorted cheeses, cold cuts and a hearty but cooling salad supplies adequate nutrition yet blends with the mood of the day. Slices, wedges, and cubes of Cheddar, Swiss, Muenster, Gouda, Edam or any cheese that particularly pleases your palate go well with delicatessen foods like spicy salami, bologna, summer sausage, baked ham, etc

* * *

We're all accustomed to mainstay salads like potato, so for a salad with a difference serve zippy Cheddar Mac. This delightful dish features grated Cheddar cheese with elbow macaroni, hard-cooked eggs and chopped summer vegetables. The dressing is sour cream heightened by a touch of lemon juice, prepared mustard and seasoned salt. Weight watchers will be pleased to know it's so much lower in calories than salads made with a mayonnaise base. Garnish the salad tray with relishes; accompany with assorted breads and crackers, with plenty of butter for spread and with tall, tall glasses of icy cold milk.

CHEDDAR MAC SALAD

1½ cups uncooked elbow macaroni
4 hard-cooked eggs, chopped
¾ cup diced celery
½ cup sliced radishes
¼ cup chopped stuffed olives
2 tablespoons chopped parsley
1½ cups shredded sharp cheddar cheese
1 cup dairy sour cream
1 tablespoon lemon juice
1 teaspoon prepared mustard
2 teaspoons seasoned salt
½ teaspoon salt

Cook macaroni in boiling salted water, until tender, according to package direction Rinse and drain. Put egg celery, radishes, olives, parsley and cheese in mixing bowl with marcaroni Combine sour cream, lemon juice mustard, seasoned salt and salt. Pour over macaroni mixture and toss until lightly blended. Chill before serving

Gelatin salads are always a favorite—to say nothing of how refreshing they are on a hot summer day. Just to look at this emerald green St Pat's Salad makes you feel cool.

ST. PAT'S SALAD

2 packages lime-flavored gelatin
1 cup boiling water
1 cup liquid from canned peach slices
2 cups cold water
1 (1-pound 1-ounce) can of peach slices
1 cup red or green grapes, seeded and halved
1 red maraschino cherry

Dissolve gelatin in boiling water. Add peach liquid and cold water; mix well. Pour small amount of mixture into bottom of mold that has been rinsed in cold water. Let chill until partially set. When set, press peaches into gelatin in bottom of mold and place a maraschino cherry in center. Chill remaining gelatin until partially set. Dice peach pieces not used in decoration. Add these and sliced grapes to gelatin. Pour into mold and chill until set. Unmold on serving plate and surround with lettuce leaves filled with cottage cheese.

* * *

Tuna, ever popular and so versatile, combines with tomato juice for a colorful and tangy salad that's easy on the budget and cool for a warm day.

TUNA TOMATO MOLD

7-oz. can chunk-style tuna
2 tablespoons chopped onion
½ cup coarsely chopped celery
2 tablespoons chopped parsley
1 envelope unflavored gelatine
¼ cup water
18-oz. can tomato juice.
1 tablespoon Parmesan cheese
½ teaspoon oregano

Combine tuna with onion, celery and parsley Soften gelatine in cold water, add to tomato juice, Parmesan cheese and oregano. Heat, stirring constantly until gelatin and cheese are dissolved Combine with tuna mixture and pour into one-quart greased mold. Chill until firm.

* * *

RIBBON SALAD

3-oz. package strawberry flavored gelatin
1 envelope unflavored gelatine
¼ cup cold water
1-pound can fruit cocktail, drained (reserve syrup)
½ cup syrup from fruit cocktail
1 pint creamed cottage cheese
3-oz. package line flavored gelatin
Lightly oil a 9x5x3-inch loaf pan. Prepare strawberry gelatin according to package directions. Pour into pan and chill until firm. Soften unflavored gelatine in cold water; bring syrup to a boil, remove from heat and dissolve unflavored gelatine in syrup. Stir into cottage cheese. Add drained fruit cocktail and spread this mixture evenly over strawberry gelatin Chill. Prepare lime flavored gelatin according to package direction; chill until mixture mounds when dropped from a spoon. Pour over cheese layer Chill To unmold; loosen edges with spatula, dip pan into hot water for a few seconds only and invert on serving plate

● Seasonal Salads

(From page 7)

A salad dressing for a tossed fruit salad, made with peak-of-the-season summer fruits—

BUTTERMILK SALAD DRESSING

4 tablespoons flour
1 teaspoon salt
1½ teaspoons dry mustard
3 tablespoons sugar
1½ cups buttermilk
2 eggs, beaten
1 tablespoon butter
2 tablespoons vinegar
⅛-¼ teaspoon basil

Mix dry ingredients together in a saucepan. Blend in a little buttermilk and stir until smooth. Add remaining buttermilk and eggs Cook over low heat, stirring constantly until thickened. Do not boil. Remove from heat Add butter, vinegar, and basil. Cool. Serve tossed with a fruit salad of apples, oranges, grapes, bananas and other fruit. Makes 2 cups.

* * *

A tangy dressing for a tossed vegetable salad—

SOUR CREAM-BLUE CHEESE DRESSING

½ cup crumbled Blue cheese
½ teaspoon salt
⅛ teaspoon pepper
1 tablespoon finely chop-onion
Few drops Worcestershide sauce
1 teaspoon lemon juice
1 cup dairy sour cream

Blend all ingredients except sour cream in a bowl, mixing well. Fold in sour cream. Chill thoroughly before tossing with salad greens Makes 1½ cups.

Best Food Buys

Seasonal Vegetables Plentiful

July picnics and vacations help explain the popularity of outdoor eating, reports. Tom Piper, Penn State Marketing Agent.

According to surveys some 15 million American families now own outdoor cookery equipment. Retail food store managers recognize the popularity of outdoor eating. This week they will feature round, T-bone and sirloin steaks in meat sales. Chicken will be featured by some stores but at slightly higher prices. Small turkeys and smoked picnic hams continue to hold bargain price tags.

Nature never takes a holiday. Large supplies of fresh fruits and vegetables are coming to market—bargains expand seasonally.

Salad greens, cabbage, cucumbers, onions, sweetcorn, green beans, and potatoes will be included in the list of bargains at the produce counter this week-end Tomato prices are generally unchanged but promise to move down in the next couple of weeks when local production will reach the market Washington Boro tomatoes promise to begin moving to market in some volume next week.

At the fruit counter, blue berries, bananas, apricots, & watermelons hold the good buy positions. Cantaloupe prices give promise of moving higher as harvest of the Arizona crop ic about over

Local raspberry harvest is at its peak this week Homemakers who plan to can or freeze a supply of these fruits should place orders this week.

CONSERVE MOISTURE

Conserving moisture in the orchard will help growers get higher yields and bigger fruits Carl Bittner, Penn State extension pomologist, says mulching is the best method of insuring an adequate supply of moisture.

Everybody likes to feel important every now and then. To help this along, every husband and wife should make a contribution by telling each other how wonderful they are at least once a week.

BURLING'S CHICKS For Top Quality Eggs

At NEPPCO Shows, our egg quality has been highest among all entries. These were hen eggs—after they had been laying 12 to 14 months. That's when Quality Eggs pay best.

At Bill Burling's you can find just what you want.

You have eight top strains and crosses to choose from. Our Sexlinks are very popular with nearby farmers.

Then there are the "pick" of the best strains and crosses for Broilers, or meat-and-eggs.

One customer said our Carey Leghorns are: "Just wonderful birds to handle". That's **important** in high-powered Leghorns.

Burling's Big 8

Carey's Famous Random Sample Test-winning Leghorns. A customer made a 270-egg average on 1800 birds!

Merryknoll Sexlink (Rock x Red)—Bred by electronic "brain" methods.

Golden Sexlinks — Harco male x Andrews White Rock female. They're tough, and great layers.

Cobb's White Rocks — Broiler Test winners and good layers too.

Vantress x Cobb White Rocks — Popular for meat.

Garrison Cornish Male x Cobb White Rock female Super meat quality.

Gove's Barred Rocks. Still a favorite of many farmers.

Burling's New Hampshires. Carefully selected stock.

When you're ready to order, pick up the phone and call Oxford 286 collect.

Sewing Contest Is Won By Lois Overgaard

Miss Lois Ann Overgaard, 16, of Lancaster R4, has been named state Class B winner in the 1960 National Grange Sewing Contest She was one of 147 contestants who participated in the contest on the state level.

Her winning garment was a sleeveless square neck dress with four-gore pleated skirt, in pink and white flowered material. It is accented with a waist length, short-sleeved jacket with an applied band, matching of the dress, that ties in front.

Lois is secretary of the Future Teachers of America Club at Conestoga Valley High School, where she will be entering 11th grade She also is active in county 4-H Club activities. She was sponsored in the contest by Mrs. Verna Mae Walton of Colerain Grange 1667, Lancaster County.

PRUNE SHRUBS

Prune flowering shrubs immediately after they finish flowering, reminds A. O. Rasmussen, Penn State extension ornamental horticulturist This practice is necessary because next year's flowering wood is produced after this year's blooming.

Keep Cows Comfortable For Hot Weather Production

Associate Chester County Agent Joseph H. Way says "if dairymen would be as considerate of their cows' comfort during hot summer days as they are of their own comfort, they'd be better off financially."

He believes a little extra care will help prevent the unsual hot weather slump in milk production, and the accompanying reduction of fat content

Way lists these practices to help realize more profit from dairying in summer

Provide plenty of shade If trees are not available a cheap shelter will serve the purpose and pay dividends On farms where zero grazing is practiced cows will cons ume more chopped grass if the feed bunks or self-feeding wagons are located in the shade.

Supply cool, clean water at easily reached places. Don't force cows to go long without water On the average a cow needs 12 to 15 gallons of water a day. In hot weather they may drink as much as 80 per cent more than on cool days.

Feed good hay on Pasture all the time, and locate the feed rack out of the sun. Flies and other tormenting insects cause much irritation and unrest in dairy herds. follow a good regular spray control program

Since cows don't graze much during the heat of the day make the best pasture available at night when most of the grazing is done

In order to provide constant new pasture growth, clip and rotate pastures regularly.

Way concludes "If a cow can lie down in comfort and contentment with a full stomach during the hot summer months the efforts to provide that comfort will be well paid"

Harvesting Grain?
Take Advantage of Our Grain Bank and Grain Storage Program

- SPECIAL BENEFITS OF OUR GRAIN BANK PROGRAM
  All grains stored under this program can be returned to the grower in any form of poultry or livestock feed, by using one of the various concentrate programs. There is **no** livestock or poultry feed that this concentrate and grain program does not cover.
  We are equipped to handle your grain in order to eliminate any storage or handling which may occur with on the farm storage. Our present storage is approximately 50,000 bushel.
- STORAGE
  All grain in the Grain Bank will be returned to the owner on the basis of the exact weight brought in on the day of delivery. NO SHRINK WILL BE DEDUCTED.
- STANDARD HAULING CHARGES IN EFFECT

Mulch Gardens

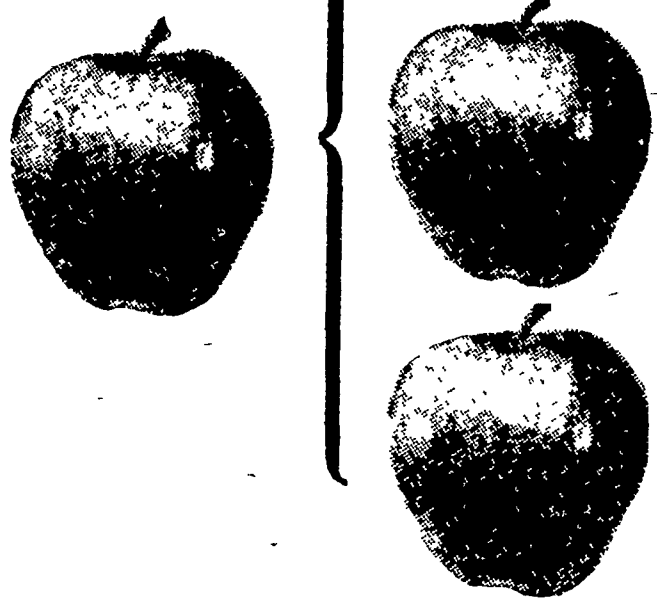
(From Page 1)

Mulch then competes with plants for available soil nitrogen To remedy this, add some nitrogen fertilizer.

A good recommendation is a half pound of ammonium sulfate, or nitrate of soda, or ⅓ pound of ammonium nitrate per 100 square feet of mulched area to provide the nitrogen needed. When straight nitrogen fertilizers aren't available, use 1 pound of a complete fertilizer such as 10-6-4.

The next Pennsylvania State Farm Show will be held January 9-13, 1961.

1 to 3



For every dollar invested in limestone, experiment stations conclude, three dollars are returned in crops

Where else does one dollar bring three in return? It pays to use agricultural limestone!

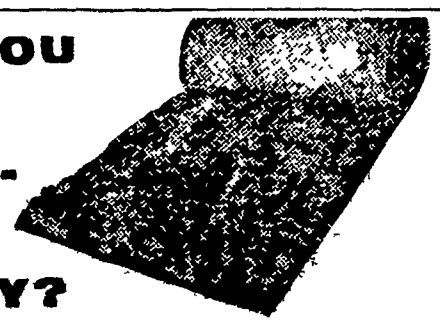
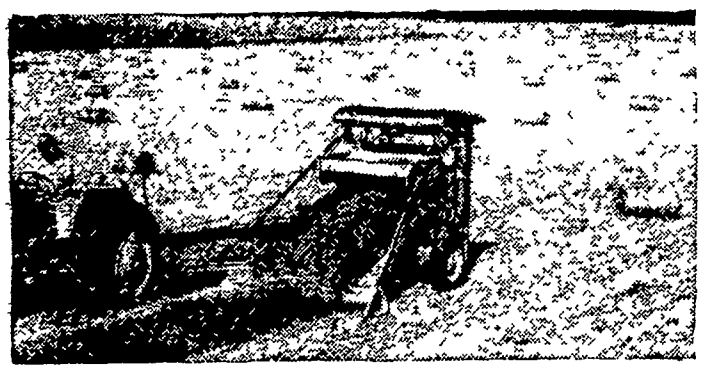
HAVE YOU SEEN ROUND-BALE QUALITY?





There's an important difference in hay when it's put into leaf-saving round bales, that roll in the leaves and protect them against weather damage. Compare the quality with any other hay . . . see the difference for yourself. These unique bales are made only by the ROTO-BALER.

Make up to seven bales a minute with the ROTO-BALER . . . continuous-flow, non-stop operation.

Use the ROTO-BALER for big-capacity baling at rock bottom cost.

Roto Baler is an Allis Chalmers trademark.

Ask us about the Allis-Chalmers plan to finance your time purchase of farm equipment.

Vegetable

(From Page 1)

tour, as well as a commercial planting of the Fireball tomato and the use of black plastic mulch.

Funk invites all vegetable growers in the state to join with vegetable men from surrounding states and indivuals from related industries in the annual event.

CHICK COMFORT

In hot weather adequate ventilation of the brooder house and ample shade on the range are necessary for successful growth of chicks, say Penn State extension poultry specialists. Good brooder house ventilation helps remove the hot air which accumulates under the roof.

Farm land prices in the United States advanced to a new high last year, but the rate of advance was not so rapid as in other recent years

Good Sires

(From page 1)

Avoid slow growing animals. Rapid gains and good feed efficiency go hand-in-hand. This puts more money in your pocket.

Select the proper type for the breed and species.

Avoid ruptures or hernia in sires. This is an inherited characteristic and is passed on to offspring. Avoid these undesirable characteristics, for they are factors that can definitely cut income possibilities for years to come.

Know good livestock. Many buyers don't know the proper type. If you don't know good livestock take someone with you who does.

Livestocsk men say the adage "A good sire is half the herd and a poor sire is all the herd" is truer today than ever.

The Alaskan brown bear is the world's largest meat eating animal.

Milk Use

(From Page 1)

in the Special milk program, the others had a milk service but not the Special Milk Program. Interviewers asked the children how much milk and other beverages they had consumed at school and away from school during a representative 24-hour period

Milk consumption per child attending Special Milk Program schools averaged 25 1 ounces per day, or 7 percent more than the average of 23.4 ounces for children attending the other schools, the report states. Both groups drank about the same amount of milk at home, children in Special Milk Program schools drank nearly a third more milk at school than the other children

The study on which this report is based is part of a program of research designed to expand markets for farm products.
